

(2) No specification amendments are required.

(3) **REMARKS**

None.

(4) **AMENDMENTS: VERSIONS WITH MARKINGS TO SHOW CHANGES MADE**

IN THE CLAIMS:

Filed herewith pursuant to Rule 121 is a clean version of the entire set of pending claims remaining after the following amendments have been entered.

1. (1st amended) A hard copy system comprising:
rewritable medium having a bistable, electrochromic, colorant susceptible to localized electrical fields;
associated with said medium, an electrode subsystem producing said localized electrical fields wherein said fields are associated with data to be printed; and
affixed to said electrode subsystem, a scanning navigation subsystem for positioning said data on said [media] medium.

35. The method as set forth in claim 34 wherein said rewritable [media] medium is a rewritable [media] medium having bistable, electrochromic, colorant [layer] susceptible to localized electrical fields.

Please add the following new claims.

36. (New) The method as set forth in claim 35 wherein said colorant is at least one layer of a molecular colorant coating wherein molecules of the coating are at least bichromal and

1 subjectable to bistable switching between color states under influence of said localized electrical
2 fields.

3
4 37. (New) A method of manufacture of a hand held scanning and printing apparatus, the
5 method comprising:

6 in a hand held scanner device, aligning an array of electrodes for producing localized
7 electrical fields for manipulating a bistable, electrochromic, molecular colorant on a rewritable
8 medium; and

9 tuning said fields such that molecules of the colorant are subjectable to bistable
10 switching between color states under influence of said fields such that data captured by said
11 device is printable on said medium.

12
13 Questions or suggestions that will advance the case to allowance may be directed to the
14 undersigned by teleconference at the Examiner's convenience.
